

My Stock Market Data Project

Functional Requirements:

SymbolsView

As an anonymous/ authenticated user I can:

- Visit the Symbols page to see all the stocks in the symbol watchlist
 - Route / and route /symbols both access the Symbols page
 - Clicking Home on the navigation bar also accesses the Symbols page
- Type a search term into a Search edit box, and the page displays only the symbols whose name contains the search term (ignoring case)
- Click on the navigation links to view either the Connect page or the Exchange Info page

Only as an authenticated user can I:

- Click the Add Symbol button to reveal a form that allows for inputting information in order to add a stock to the watchlist
- Click on a symbol to visit the Data Entries page to see it's market data

DataEntriesView

As an authenticated user I can:

- Visit the Data Entries page to see the data that belongs to a symbol selected from the list on the Symbols page
- Click a button to go back to the Symbols page
- Click a button to delete the selected stock and it's data

ExchangeInfoView

As an anonymous/ authenticated user I can:

- Select an exchange to view details and relevant information
- Click a button the returns to the Symbols page

ConnectView

As an anonymous/ authenticated user I can:

- Visit the connect page to see contact details
- Click a button to return to the symbols page
